Intro to SmartGOGS

What are SmartGOGS?

SmartGOGS are High Tech glasses that help you complete work/assignments stress free throughout the day. They have cool features like a blinking monitor and shield-like lens that fights blue rays from entering your eyes.

What is a blinking monitor?

When someone stares at a screen for a long time, their blinks per minute (BPM) will decrease. Wearing these glasses will prevent that. Whenever the blinking monitor senses your number of blinks decreasing, the glasses will vibrate and make a 'bzzz' sound. This will tell you to take an eye break, rest your eyes, or blink a bit more.

Why is Blue Light bad?

If your eyes come into contact with a lot of Blue Light, then you are increasing the risk of developing eye disease. Experts think that eye stains affect roughly 50% of computer users. One possible symptom of eye strains is dry, irritated eyes. Too much screen time can cause your eyes to disfunction and do things they aren't supposed to, limiting your sight.

Users Journey/Storyboard

This is Marcus. He is an A+ student in Grade 7, currently attending virtual school.

He has to use his computer to attend class and finish work, meaning that he is online for at least 6 hours every day.

He starts getting headaches and eye strain,
causing him to lose focus in class.

#SHOCK#

Soon enough, Marcus starts failing tests, struggling to pay attention to classes and has trouble completing his assignments on time.

One day, Marcus saw an ad on TV for something
that might change his life.

Audio: SmartGOGS! A set of UV/Blue light blocking glasses for people of all ages to use! They help track your blinking habits to tell you when you've been online for too long, A camera to take photos of your notes, all of that! Simply get yourself a pair and download the app, and you're all set!

If you get them, you are held to a 10 year contract to give us half of your yearly salary!

These glasses will tell Marcus when he's been online for too long or when he needs an eye break. They do so by slightly vibrating near his eye. This way, Marcus is able to do a lot better in school.

Ever since wearing SmartGOGS, Marcus is no longer failing classes! He's doing much better in school and enjoying school much, much more.

are awesome

The GRID (PSVC)

<p>Pain point: People spending too much time online due to the pandemic.</p>	<p>Solution: We are providing glasses that are advanced by technology and provide info to help eye health.</p>
<p>Value: SmartGOGS help you avoid blue rays from entering your eyes, and it gives you reminders when you've been online for too long. It has a camera that monitors your blinking to tell whether or not you have been online for too long.</p>	<p>Competition: Any other company that makes smart glasses (Apple with their apple glasses, Google glasses, Samsung glasses)</p>

Collected Data & Site

Company Name

We had 5 options for our company name. Clever Gogs, SmartGOGS, Gen Z Choice Specs, Luni-techs and Luni-specs. 30.8% voted for Luni-techs, 23.1% voted for Luni-specs, 7.7% chose Gen Z Choice Specs and finally, 38.5% voted for SmartGOGS. After a close vote, SmartGOGS took the lead and was what we ended choosing.

Which of these five names seems like the best for our service in your opinion?

**SMARTGOGS
FOREVER**

Logo

We had five options for logos. (see below) Colour splashes had 7.1% of the votes, Galaxy + Clouds had 21.4% of the votes, The one in the middle had 14.3% of the votes, pink and purple splashes has 21.4% of the votes and finally, the logo that was matching with the website won the vote with 35.7%. However, we lightened the colours a bit, to make it more appealing and actually like a logo.

Website

We've also sent out forms regarding which SmartGOGS website layout we wanted to use. Here are the links to sites A and B respectively:

https://sites.google.com/student.tdsb.on.ca/smartgogs/home?read_current=1

https://sites.google.com/student.tdsb.on.ca/smartgogsv2/home?read_current=1

Looking at the results, we can see that site B was the most voted, with 81.8%, which is why we decided to use site B as the website layout.

Rapid Prototyping

Finally, we sent out forms about very small changes to our website, regarding the header image and the font we should use, as a form of “rapid prototyping”. Below, we can see the results:

Seeing as header 2 won with 60% of the votes, that was the header we are going to use. The font we chose was open sans, as it won that vote with 80%.
